## Abstracts

The global Snake Venom Tripeptide market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Snake Venom Tripeptide are small peptides that mimic the activity of snake venom toxins. Instead of snake venom, it is an active peptide with a structure similar to snake venom toxin. Snake venom peptides are five times more effective than botulinum toxin in reducing dynamic wrinkles, and human tests have found that they can effectively reduce wrinkles by 52% after 28 days of use. Snake venom peptides reduce the production of wrinkles by inhibiting muscle contraction, and their effect is more pronounced than acetyl hexapeptide-8. Snake venom peptides have excellent smoothness and rapid wrinkle removal properties. Add lotion, gel, etc. into the cosmetics formula to achieve the ideal effect of removing deep wrinkles or wrinkles around the forehead or eyes.

This report studies the global Snake Venom Tripeptide production, demand, key manufacturers, and key regions.
