Abstracts

According to our (Global Info Research) latest study, the global Sneakers and Clothing market size was valued at US\$ 280390 million in 2025 and is forecast to a readjusted size of US\$ 420960 million by 2032 with a CAGR of 6.0% during review period.

Sneakers and clothing encompass a wide range of footwear and apparel, often associated with athletic or casual wear. Sneakers, also known as trainers or athletic shoes, are designed for sports, exercise, or everyday use, prioritizing comfort and performance.

Sports shoes and clothing are two major categories of products related to fashion, sports and lifestyle. Sports shoes are shoes designed primarily for sports or other forms of physical exercise, but are also widely used for daily casual wear. Clothing is any clothing that covers a part of the body, such as shirts, pants, jackets, dresses, etc.

Market data from different institutions show that in 2020, China's outdoor sports footwear and clothing market showed a slight negative growth trend for the first time. But in 2021, it returned strongly and surpassed the level of 2019. In 2023, it is expected that the scale of China's outdoor sports footwear and clothing industry will exceed 500 billion yuan. According to the definition of traditional outdoor sports, outdoor sports only include camping, skiing, cycling, water sports and fishing. The total scale of these outdoor sports is only about 50 billion. However, for the social environment where the boundaries between contemporary sports and life are gradually blurred, the connotation of outdoor sports will be greatly magnified. Traditional indoor footwear and clothing such as running, large and small ball games, and even yoga and fitness are gradually becoming daily and outdoor. The outdoor sports footwear and clothing market was also

stimulated by this social background and received a strong round of promotion before the epidemic. This trend will continue to a certain extent in the future, but whether a new surge can occur again depends on breakthroughs in the production and manufacturing links of the footwear and apparel industry.

This report is a detailed and comprehensive analysis for global Sneakers and Clothing market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Sneakers and Clothing market size and forecasts, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2021-2032
