Scuba Diving and Snorkeling Devices refer to a range of professional and recreational equipment designed to support breathing, mobility, visibility, and safety in underwater environments. These devices are widely used in recreational scuba diving, snorkeling tourism, underwater photography, marine research, and professional underwater operations. Typical equipment includes scuba systems such as air tanks, regulators, and buoyancy control devices (BCD), as well as snorkeling gear like masks, snorkels, and fins, along with various safety and auxiliary accessories. Their primary purpose is to ensure safe breathing, clear underwater vision, buoyancy control, and efficient movement, while enhancing comfort and overall user experience. Depending on depth, duration, and skill level, scuba diving and snorkeling devices differ significantly in terms of materials, sealing performance, pressure resistance, and ergonomic design, making them essential tools for modern underwater activities and ocean exploration.
