Snow and Ice Removal Equipment refers to a comprehensive category of machinery designed specifically for clearing snow and ice accumulation from roadways, airport runways, railways, and other critical infrastructure. These tools operate primarily through mechanical displacement (physical removal) or chemical application (de-icing). Common examples include snow plows for pushing snow, snow blowers for cutting and throwing snow, motor graders for scraping compacted ice, and material spreaders for applying de-icing chemicals or abrasives. The primary objective of this equipment is to restore pavement friction, ensure traffic flow, and minimize safety hazards associated with winter weather conditions.
