Abstracts

The global Snow Saw market size is expected to reach \$ 11 million by 2029, rising at a market growth of 4.2% CAGR during the forecast period (2023-2029).

The avalanche safety equipment market is primarily driven by growing public safety concerns. The fact that avalanches can strike at any time and without warning has led to increased safety concerns. The growing popularity of snow-related activities such as skiing, hiking, and other winter sports and consumer awareness about the safety benefits of using avalanche airbags are driving the avalanche safety market. As safety is the most important consideration for industry players in the avalanche safety market, the demand for these accessories will increase in the coming years.

Snow saws are lightweight, low-profile and easy to carry in a backpack, and are designed to cut snow. Used for a variety of purposes - performing stability tests in snow pits such as rutschblock tests or compression tests, cutting blocks to build walls for shelters or windbreaks, cutting cornices and also for cutting fire wood with a cm snow saw.
