According to our (Global Info Research) latest study, the global SOAR Security Tools and Solutions market size was valued at US$ 2038 million in 2025 and is forecast to a readjusted size of US$ 5715 million by 2032 with a CAGR of 15.8% during review period.

SOAR stands for Security Orchestration, Automation and Response. SOAR Security Tools and Solutions refer to the complete combined portfolio of dedicated security software tools, supporting hardware, customized implementation engineering, and ongoing managed services built around SOAR core capabilities.

This integrated package unifies three core value layers:

SOAR Tools: Standalone or embedded software modules that provide orchestration connectors, low-code playbook editors, incident case management, threat intelligence aggregation, and automated response execution engines;

SOAR Solutions: End-to-end customized delivery packages that combine these tools with site survey, architecture design, cross-tool integration, playbook development, system deployment, testing, compliance configuration, staff training, and post-launch operation maintenance.

Collectively, they connect disjointed security infrastructure (SIEM, EDR/XDR, firewalls, CSPM, IAM, vulnerability scanners, threat intel feeds, ticketing systems) to standardize alert triage, incident investigation, containment, eradication, recovery, and post-incident review. The primary business goals are to cut repetitive manual analyst labor, shorten
