Abstracts

Social business intelligence uses data from social media and analyzes the data using big data analytics to obtain important business insights on the market. It is also used to know the market reputation for products. It unifies several business tools such as business intelligence, knowledge management, social networking, project management, collaboration, social media monitoring, and analytics to give a new interface for organizations to understand their business environment more thoroughly. It provides reliable data and aids enterprises to connect with new customers and resolve operational conflicts in a faster and better way than traditional business intelligence does. The demand for Social Business Intelligence was triggered by the introduction of a wide range of social networking services, increased competition, and globalization of business process, digitalization, and decentralization of information flow.

According to our (Global Info Research) latest study, the global Social Business Intelligence market size was valued at US\$ 4794 million in 2023 and is forecast to a readjusted size of USD 24920 million by 2030 with a CAGR of 26.9% during review period.

IBM, Oracle, SAP and SAS Institute are the top 4 players of Social Business Intelligence, with about 60% market shares.
