According to our (Global Info Research) latest study, the global Socket-Outlet Residual Current Devices market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Residual Current Devices help protect people and equipment against electrical shocks caused by indirect contact. RCDs work together with Miniature Circuit Breakers (MCB) or fuses, covering the whole system against potentially damaging thermal and dynamic stresses of any overcurrent. This unit replaces a standard socket outlet. It provides protection to anyone that comes into contact with the equipment plugged into the socket outlet and its leads. These are great for both fire and electrocution protection when using appliances.
