The global Soderberg Electrode Paste market size is expected to reach \$ 1634.5 million by 2029, rising at a market growth of 2.1% CAGR during the forecast period (2023-2029).

Global key players of Soderberg electrode paste include Yangguang Carbon, Elkem, Rongxing Group, Energoprom Group, Tokai COBEX, etc. The top five players hold a share over 60%. Asia-Pacific is the largest market, has a share about 65%, followed by Europe, and North America, with share 11% and 10%, separately.

Electrode paste was invented by Mr. Soderbergh. It is usually called Soderbergh electrode paste. The production process of electrode paste itself is relatively simple. Basically, it is calcined anthracite, calcined petroleum coke, residual anode, graphite powder, etc. Crushing, sieving and grinding, then mixing and heating in a certain proportion and kneading with coal tar pitch to form a carbon paste with good fluidity and high plasticity, and finally an electrode paste with a certain shape and size through natural molding. In the production of different types of ferroalloys and calcium carbide, it is self-baked into a conductor in a submerged arc furnace.

This report studies the global Soderberg Electrode Paste production, demand, key manufacturers, and key regions.
