Abstracts

According to our (Global Info Research) latest study, the global Sodium Acetate Carbon Source market size was valued at US\$ 283 million in 2025 and is forecast to a readjusted size of US\$ 616 million by 2032 with a CAGR of 11.7% during review period.

In 2025, global sales volume of Sodium Acetate Carbon Source was approximately 1.25 million tons. Based on a combined commercial-ton basis covering both liquid and solid products, the average global market price was around USD 220 per ton. Gross margins of major manufacturers in the industry were generally in the range of 12%-25%.

Sodium Acetate Carbon Source is an external carbon source product used for denitrification in wastewater treatment. Its main active ingredient is sodium acetate, which provides readily available organic carbon, electron donors, and energy for denitrifying microorganisms, promoting the conversion of nitrate nitrogen and nitrite nitrogen into nitrogen gas, thereby reducing total nitrogen in wastewater. The product is generally available in solid and liquid forms. By active ingredient, it can be classified into single sodium acetate type and sodium acetate blended type. Liquid Sodium Acetate Carbon Source offers convenient dosing and fast biological utilization, while solid Sodium Acetate Carbon Source is easier to store, transport, and preserve for long periods.

The upstream raw materials of Sodium Acetate Carbon Source mainly include glacial acetic acid, soda ash, caustic soda, water, blended organic acids, sustained-release additives, and packaging materials. The midstream segment involves reaction synthesis, concentration adjustment, blending modification, quality testing, and filling. Downstream applications are mainly concentrated in municipal wastewater, industrial

wastewater, landfill leachate, river water and reclaimed water, and other denitrification treatment scenarios. With increasingly stringent total nitrogen discharge standards, growing demand for advanced treatment of industrial park wastewater, and rising demand from wastewater treatment plants for safe, stable, and easy-to-dose carbon sources, Sodium Acetate Carbon Source is expected to maintain steady growth in the external carbon source market.
