Abstracts

According to our (Global Info Research) latest study, the global Sodium Butylparaben market size was valued at US\$ 8.06 million in 2025 and is forecast to a readjusted size of US\$ 10.23 million by 2032 with a CAGR of 3.4% during review period.

Sodium Butylparaben is a white, hygroscopic powder classified as a water-soluble preservative within the paraben family. Due to its broad-spectrum antimicrobial properties, it is widely utilized in pharmaceuticals, cosmetics, dairy products, and industrial preservation applications, demonstrating exceptional efficacy in eliminating molds and yeasts.

In 2025, global sales volume is projected to approach 1,000 tons, with a market price of approximately \$9?12 per kilogram. The industry's gross margin is estimated to be around 10%?15%.

The key upstream raw materials are p-hydroxybenzoic acid and n-butanol; consequently, fluctuations in phenol prices and the stability of n-butanol supply directly impact production costs. The midstream segment encompasses the fine chemical manufacturing process, where the primary barrier to entry lies in controlling the purity of long-chain esters following the salt-formation reaction, ensuring compliance with pharmaceutical or cosmetic grade standards. Downstream applications focus on high-end markets with exceptionally stringent requirements for antimicrobial efficacy?specifically sectors such as premium cosmetics and pharmaceuticals.
