Abstracts

The global Sodium Hydrosulfite market size is expected to reach \$ 337 million by 2032, rising at a market growth of 1.2% CAGR during the forecast period (2026-2032).

Sodium hydrosulfite (also known as sodium dithionite) is a white crystalline powder with a weak sulfurous odor. It is a crystalline salt $\text{Na}_2\text{S}_2\text{O}_4$ made by reduction (as of sodium bisulfite or sulfur dioxide with zinc) and used as a reducing agent especially in dyeing, printing, and stripping textiles and as a bleaching agent.

The global sodium hydrosulfite market is experiencing steady growth, primarily driven by its extensive use as a reducing and bleaching agent in industries such as textiles, paper and pulp, and mining. In the textile sector, it is essential for processes like vat dyeing and color stripping, while in the paper industry, it enhances brightness and quality. Additionally, sodium hydrosulfite finds applications in water treatment, cosmetics, and food processing, contributing to its diversified demand. The Asia-Pacific region, especially countries like China and India, leads the market due to robust industrial activities and a growing textile manufacturing base.

Despite its advantages, the market faces challenges such as environmental concerns related to brine disposal and the toxic nature of the compound, which can impact its production and transportation. Regulatory pressures and a rising emphasis on sustainability are prompting manufacturers to invest in safer handling technologies and alternative synthesis methods. Furthermore, the declining demand in the paper and pulp industry, particularly in North America and Europe, poses a restraint on market growth. Nevertheless, ongoing innovations and the expansion of applications in emerging sectors are expected to sustain the market's upward trajectory.

This report studies the global Sodium Hydrosulfite production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Sodium Hydrosulfite and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
