Abstracts

The global Sodium N-Cocoyl Glycinate market size is expected to reach \$ 208 million by 2032, rising at a market growth of 6.6% CAGR during the forecast period (2026-2032).

Sodium N-Cocoyl Glycinate is a kind of amino acid-based surfactant. It's widely used in personal care. Generally it is classified as skin conditioning hair conditioning cleansing.

The Sodium N-Cocoyl Glycinate market is experiencing significant growth, driven by increasing consumer demand for natural and mild surfactants in personal care products. Derived from coconut oil and glycine, this biodegradable ingredient is favored for its gentle cleansing properties, making it suitable for sensitive skin and aligning with the clean beauty movement. As consumers become more conscious of ingredient safety and environmental impact, brands are reformulating products to include Sodium N-Cocoyl Glycinate, contributing to its rising adoption in facial cleansers, shampoos, and body washes.

Geographically, the Asia-Pacific region is leading the market expansion, driven by rapid urbanization, increasing disposable incomes, and a growing preference for natural personal care products. Countries like China, India, and Japan are significant contributors to this trend. North America and Europe also present substantial opportunities, with consumers in these regions showing a strong inclination toward eco-friendly and sustainable personal care items. Despite challenges such as higher production costs and competition from alternative surfactants, the market for Sodium N-Cocoyl Glycinate is poised for continued growth, supported by evolving consumer preferences and regulatory support for safer, cleaner ingredients.

This report studies the global Sodium N-Cocoyl Glycinate production, demand, key manufacturers, and key regions.
