Abstracts

The global Sodium-Sulfur Battery market size is expected to reach \$ 64 million by 2029, rising at a market growth of 10.5% CAGR during the forecast period (2023-2029).

Global key player of Sodium-Sulfur Battery is NGK Insulators, with a whole share 100%. Asia-Pacific is the largest market, with a 100% share. In terms of product type, above 1000MWH is the largest segment, with a share about 60%. In terms of application, Industrial, Commercial and Residential is the largest market, with a share about 50%.

This report studies the Sodium-Sulfur Battery (NaS) market, A sodium–sulfur battery is a type of molten-salt battery constructed from liquid sodium (Na) and sulfur (S). This type of battery has a high energy density, high efficiency of charge/discharge (89–92%) and long cycle life, and is fabricated from inexpensive materials. However, because of the operating temperatures of 300 to 350 °C and the highly corrosive nature of the sodium polysulfides, such cells are primarily suitable for large-scale non-mobile applications such as grid energy storage.

This report studies the global Sodium-Sulfur Battery production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Sodium-Sulfur Battery, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Sodium-Sulfur Battery that contribute to its increasing demand across many markets.
