According to our (Global Info Research) latest study, the global Sodium Vapour Lamp market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

A Sodium Vapour Lamp is a type of gas-discharge lamp that uses sodium in an excited state to produce light. It is known for its high efficiency and distinctive yellow-orange glow. There are two types: low-pressure and high-pressure sodium lamps. Low-pressure sodium lamps are highly efficient in terms of lumens per watt but have poor color rendering, making them suitable for street lighting and other outdoor applications. High-pressure sodium lamps offer better color rendering and are used in a wider range of applications, including both outdoor and indoor lighting. These lamps are favored for their long lifespan and energy efficiency.
