Soft forming edge banding machine is an automatic equipment capable of efficient and high-quality edge-banding treatment for various shapes (including straight edges and curved edges). It uses hot melt adhesive to firmly adhere the pre-heated and softened edge sealing material to the edge of the plate, and forms a beautiful and lasting edge sealing effect after cooling and shaping. This sealing method is especially suitable for high-end furniture production that needs to deal with complex contours, such as cabinet doors, table and chair legs, etc.
