The global Soft Robotic Gripper market size is expected to reach \$ 1341.3 million by 2029, rising at a market growth of 25.5% CAGR during the forecast period (2023-2029).

Global 5 largest manufacturers of Soft Robotic Gripper are Soft Robotics, Festo, Piab, SoftGripping (Wegard) and NITTA, which make up about 56%. Among them, Soft Robotics is the leader with about 17% market share.

North America is the largest market, with a share about 35%, followed by Asia-Pacific and Europe, with the share about 30% and 28%. In terms of product type, Pneumatic Gripper occupy the largest share of the total market, about 71%. And in terms of product application, the largest application is Food and Beverage, followed by Logistics.

A soft robotic gripper is a type of robotic hand or gripper that is made from flexible and elastic materials, such as silicone or rubber. Unlike traditional robotic grippers that use rigid and mechanical components, soft robotic grippers are designed to be more adaptive and versatile, allowing them to handle delicate objects or irregular shapes more effectively.

Soft robotic grippers typically consist of an inflatable bladder or a series of soft actuators that can be filled with air or fluid to change shape and grip objects. They can conform to the shape of the object being grasped, providing a more secure and gentle grip.

One of the advantages of soft robotic grippers is their ability to handle a wide range of objects, including fragile or irregularly shaped items that are challenging for traditional grippers to grasp. They can also operate in unstructured environments, where there may be uncertainties or obstacles that require adaptive grasping.

This report studies the global Soft Robotic Gripper production, demand, key manufacturers, and key regions.
