According to our (Global Info Research) latest study, the global Softshell Pants market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Softshell pants have a stretchy fabric that does not feel restrictive when worn, allowing people to move more freely. Softshell fabric is specially treated to effectively block the invasion of wind. Its tightly woven structure can reduce the circulation of air and provide good windproof protection, especially suitable for wearing in windy weather. Although softshell pants cannot completely replace professional waterproof pants, they usually have certain waterproof properties. The special coating on the surface of the fabric can resist light rain and splashing water, keeping the body dry. Softshell pants are an ideal choice for outdoor sports enthusiasts. Whether hiking, climbing, cycling or running, softshell pants can provide comfortable, windproof, waterproof and breathable protection.
