## Abstracts

SDDC is a data center where all the IT infrastructure is virtualized and delivered as a service. The deployment, provisioning, monitoring, and management of the data center resources are carried out through automated software, which supports enterprise legacy and modern applications. SDDC data centers help in reducing the capital expenditure (CAPEX) and operational expenditure (OPEX) and improve the efficiency, agility, control, and flexibility of data centers.

### SCOPE OF THE REPORT:

This report studies the Software Defined Data Center (SDDC) market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Software Defined Data Center (SDDC) market by product type and applications/end industries.

According to this market research report, the SDN segment will account for the major shares and dominate the market by the end of the forecast period.
