The global SOG Ultrasonic Lifting Device market size is expected to reach \$ 476 million by 2032, rising at a market growth of 9.5% CAGR during the forecast period (2026-2032).

In 2025, global production of the SOG Ultra Life reached approximately 120 units. SOG Ultrasonic Skin Lifting Device is a beauty and aesthetic device that utilizes High-Intensity Focused Ultrasound (HIFU) or multi-layer ultrasonic energy technology for skin tightening and lifting treatments. By precisely delivering ultrasonic energy to the dermis and SMAS layer, the device stimulates collagen regeneration and tissue contraction, thereby achieving skin lifting, wrinkle reduction, and facial contour improvement. The equipment typically features multiple treatment depths, adjustable energy levels, intelligent temperature control, and safety monitoring functions, enabling non-invasive and non-surgical facial rejuvenation treatments. SOG Ultrasonic Skin Lifting Devices are widely used in beauty salons, skin management centers, medical aesthetic institutions, and high-end home care applications. They are suitable for facial lifting, nasolabial fold improvement, jawline contouring, and skin laxity treatment. With the growing demand for non-invasive anti-aging solutions, personalized skincare, and comfortable aesthetic treatments, SOG ultrasonic lifting devices are gradually evolving toward intelligent operation, multifunctional integration, and precise energy control.

The SOG ultrasonic skin lifting device market has been developing steadily in recent years, driven by the growing demand for non-invasive anti-aging treatments, the increasing popularity of skin tightening and lifting procedures, and rising consumer attention to facial rejuvenation care. As an ultrasonic lifting and tightening aesthetic device, it is mainly used in beauty salons, skin management centers, medical aesthetic institutions, and high-end home care applications. The device is commonly applied for

facial contour lifting, jawline shaping, wrinkle reduction, and skin laxity treatment.

With consumers placing greater emphasis on safety, comfort, and treatment effectiveness, market demand for devices featuring multi-layer energy delivery, precise depth control, intelligent temperature management, low-pain treatment, and multifunctional integration continues to increase. At the same time, beauty institutions are expanding differentiated anti-aging programs and high-repeat treatment services, further promoting the development of SOG ultrasonic lifting devices toward intelligent operation, portability, and high-end positioning. In the future, the market is expected to maintain growth potential, while industry competition will increasingly focus on energy stability, operational safety, treatment effectiveness, equipment reliability, and brand service capabilities.
