A solar carport mount is a structure designed to hold and support solar panels for generating electricity while providing shade or protection for parked vehicles. It is a combination of a carport and a solar panel mounting system, allowing the panels to be installed on top of the carport structure.

Solar carport mounts are typically made of sturdy materials such as steel or aluminum to ensure durability and strength. They are engineered to withstand various weather conditions, including wind and snow loads. The carport structure provides a secure platform for the solar panels, ensuring they are mounted at the optimal angle and position to capture sunlight efficiently.
