According to our (Global Info Research) latest study, the global Solar Reflective Shingles market size was valued at US\$ 1315 million in 2025 and is forecast to a readjusted size of US\$ 2044 million by 2032 with a CAGR of 6.4% during review period.

In 2025, global Solar Reflective Shingles production reached approximately 68,000 K Sq.m, with an average global market price of around 18.8 USD/Sq.m.

Solar Reflective Shingles are high-performance roofing shingle products that integrate high solar reflectance and thermal emittance characteristics, reflecting ultraviolet, visible and near-infrared solar radiation to reduce roof heat absorption and indoor cooling load, while fulfilling core roofing functions of waterproofing, wind resistance and structural protection, complying with green building and energy efficiency standards.

Demand for Solar Reflective Shingles is propelled by global building energy codes, green building certification requirements, rising urban cooling costs and low-carbon construction initiatives, with consistent growth in both new construction and roofing retrofit markets; business opportunities lie in high-durability reflective material R&D, aesthetic and weather-resistant product upgrades, large-scale cost-effective production, and regional product customization for different climate zones, while policy subsidies for energy-efficient roofing and net-zero carbon building targets further expand market penetration and upstream supply chain development space.
