Abstracts

According to our (Global Info Research) latest study, the global Solenoid Valves market size was valued at USD 4664 million in 2023 and is forecast to a readjusted size of USD 5912 million by 2030 with a CAGR of 3.4% during review period.

A Solenoid Valve is an electromechanically operated valve. Solenoid Valve is used to control the fluid automatic based components, belonging to the actuator; the valve is controlled by an electric current through a solenoid: in the case of a two-port valve the flow is switched on or off; in the case of a three-port valve, the outflow is switched between the two outlet ports. Multiple Solenoid Valves can be placed together on a manifold. Solenoid Valves are the most frequently used control elements in fluidics. Their tasks are to shut off, release, dose, distribute or mix fluids. They are found in many application areas. Solenoids offer fast and safe switching, high reliability, long service life, good medium compatibility of the materials used, low control power and compact design

Global Solenoid Valves key players include ASCO, Kendrion, Danfoss, Parker, B?rkert, etc. Global top five manufacturers hold a share about 35%.
