Abstracts

According to our (Global Info Research) latest study, the global Solid Acid Catalyst market size was valued at USD 48 million in 2023 and is forecast to a readjusted size of USD 63 million by 2030 with a CAGR of 3.8% during review period.

In acid catalysis and base catalysis a chemical reaction is catalyzed by an acid or a base. Solid acid catalysts are an environmentally-friendly replacement for liquid acids, used in many significant reactions, including alkylation of light hydrocarbon gases to form iso-octane (alkylate) used in reformulated gasoline. Use of organic acids and enzymes for various reactions is to be promoted.

Although the global spread of COVID-19 has seriously affected the global supply chain, most people believe that the economy may restart in Q3.

Overall economic performance will continue to be the best indicator of future demand for Solid Acid Catalyst. Demand in most downstream markets is greatly influenced by general economic conditions. The competition among vendors will increase during the forecast period. Vendors will compete to deliver competitive advantages in the market on the basis of pricing, value-added benefits, and service portfolios. During the forecast period, we expect this competition to intensify with an increase in product extensions.
