Solid CBN insert is a type of cutting tool insert made entirely from cubic boron nitride, a synthetic material known for its exceptional hardness and thermal stability. Solid CBN inserts are particularly effective for machining hard materials, such as hardened steels and superalloys, where traditional carbide inserts may wear out quickly. They are used in various turning, milling, and grinding applications, providing excellent wear resistance, a high-quality surface finish, and longer tool life, making them ideal for high-performance machining environments.
