According to our (Global Info Research) latest study, the global Solid Corner CBN Inserts market size was valued at US\$ 295 million in 2024 and is forecast to a readjusted size of USD 450 million by 2031 with a CAGR of 6.2% during review period.

Solid angle CBN inserts refer to cutting tool components made of polycrystalline cubic boron nitride material, which are mainly used for efficient processing of high hardness materials such as cemented carbide and hardened steel. Unlike traditional welded or indexable inserts, solid angle CBN inserts are an integral structure with no internal support or connectors, and the entire insert is made of a single CBN material. This design provides extremely high strength and durability, and is particularly suitable for heavy-load, high-precision cutting tasks.
