Abstracts

The global Solid Instant Tea market size is expected to reach \$ 1536 million by 2032, rising at a market growth of 4.6% CAGR during the forecast period (2026-2032).

In 2025, global Solid Instant Tea production reached approximately 72.6k tons, with an average global market price of around US\$ 15 per kg.

Solid instant tea belongs to the category of solid beverages. It is a product made of solid materials such as powder, granules or blocks processed from food raw materials and food additives for mixing and drinking. According to GB/T18798 'Solid Instant Tea', solid instant tea is a powdered tea product made from tea leaves or fresh tea leaves, extracted by water (or squeezed from fresh tea leaves), filtered, concentrated and dried. During the production process, solid instant tea can be seasoned by adding food additives, food processing aids and appropriate amounts of food auxiliary materials (such as maltodextrin). This type of product is a tea product that can be brewed with hot water, cold water or ice water, and is convenient and fast, has the flavor and efficacy of tea, and is easy to mix with other foods. Therefore, solid instant tea can be brewed directly as a solid beverage, or as a raw material for tea beverages, food, medicine, etc. Along the value chain, instant solid tea relies upstream on tea raw materials and functional ingredient suppliers, including primary green, black, oolong and pu'er teas as well as tea polyphenol concentrates, tea extracts, creamers, carbohydrates and natural flavours. These inputs are sourced from major tea-growing regions both domestic plantations and processors and international exporters from countries like India, Sri Lanka and Kenya as well as specialised extract and food-ingredient companies. In the midstream, tea deep-processing and solid-beverage manufacturers use spray drying, freeze drying, agglomeration and premix technologies to produce pure instant tea powders, flavoured fruit-tea powders, milk-tea bases and other formats, often providing OEM/ODM services for beverage and food brands. Downstream, instant solid tea is used by branded instant-tea companies, e-commerce brands, chain cafés and

teahouses, ready-to-drink (RTD) beverage players, and bakery, dairy and snack manufacturers, either as a retail product (sticks, sachets, jars) or as an industrial ingredient in 3-in-1 milk tea, solid beverages, bottled/canned RTD teas, tea-flavoured ice creams and baked goods, thereby transforming tea from an agricultural commodity into a fast-moving consumer product and versatile food ingredient.

The annual production capacity of a single-line Solid Instant Tea is approximately 300 tons, with a gross profit margin of approximately 40%-45%.

From a market perspective, instant solid tea sits at the intersection of ?upgraded tea consumption? and ?ingredient-driven beverage manufacturing.? On the consumer side, it benefits from growing demand for convenient, portable and multi-scenario tea drinking, establishing itself as a niche alongside instant coffee and other powdered beverages and gradually gaining penetration among younger consumers and in office and travel contexts. On the industrial side, the continued expansion of RTD tea beverages, milk-tea and fruit-tea chains, and ready-to-serve drink concepts is driving sustained increases in the use of instant solid tea as a standardized source of tea flavour and polyphenols in beverage plants, foodservice chains and bakery/dairy applications, making it an important lever for the ?industrialisation of tea.? While bulk tea price and climate fluctuations impact input costs, processors can mitigate volatility through diversified sourcing, graded raw-material strategies and flexible formulation; at the same time, competition is evolving from pure price-based rivalry toward differentiation in aroma retention, solubility, clarity, pesticide and contaminant control, labelling claims (?no added flavour,? ?low-/no-sugar?) and organic/sustainability certifications. Looking ahead, instant solid tea is likely to grow faster than traditional loose-leaf tea yet somewhat slower than the most dynamic RTD new-tea concepts, with key long-term opportunities in: combining tea with functional ingredients for ?healthy tea,? energy/relaxation or meal-replacement concepts; aligning with cold-brew, water-soluble, low-sugar and plant-based trends as a core flavour module for beverage and food innovation; and developing premium instant tea, gift formats and co-branded products to enhance brand value and unit pricing while retaining its role as a versatile industrial ingredient.

This report studies the global Solid Instant Tea production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Solid Instant Tea and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Solid Instant Tea that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Solid Instant Tea total production and demand, 2021-2032, (Kg)

Global Solid Instant Tea total production value, 2021-2032, (USD Million)

Global Solid Instant Tea production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Kg), (based on production site)

Global Solid Instant Tea consumption by region & country, CAGR, 2021-2032 & (Kg)

U.S. VS China: Solid Instant Tea domestic production, consumption, key domestic manufacturers and share

Global Solid Instant Tea production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (Kg)

Global Solid Instant Tea production by Type, production, value, CAGR, 2021-2032, (USD Million) & (Kg)

Global Solid Instant Tea production by Application, production, value, CAGR, 2021-2032, (USD Million) & (Kg)

This report profiles key players in the global Solid Instant Tea market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Lipton, Nestle, Ginnar Tea, Jivraj Tea, Wagh Bakri Tea Group, Unilever, Oregon Chai, Finlays, Goodricke Group, Blueberry Agro, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Solid Instant Tea market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (Kg) and average price (US\$/Kg) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
