Abstracts

According to our (Global Info Research) latest study, the global Solid Thermoplastic Acrylic Resin (Beads Form) market size was valued at US\$ 1628 million in 2025 and is forecast to a readjusted size of US\$ 2523 million by 2032 with a CAGR of 6.4% during review period.

Solid grade thermoplastic acrylic beads resin refers to high molecular weight, solid, free flowing spherical polymers based primarily on Methyl Methacrylate (MMA) and its co-monomers. In 2025, global solid thermoplastic acrylic resin (beads form) production reached approximately 351,633 ton, with an average global market price of around USD 4,500 per ton. A factory gross profit of USD 1,215 per ton with 27% gross margin. A single line full machine capacity production is around 1,200 ton per line per year. The upstream is heavily dependent on MMA monomer supply stability. The downstream demand is concentrated in paints and coatings, construction materials and automotive. An automotive OEM uses high transparency thermoplastic acrylic resin beads to formulate UV resistant headlamp hard coatings. The coating improves weather durability, maintains gloss retention for more than five years, and enhances resistance to road chemicals and UV exposure. China leads driven by urbanization and massive producers expansion. Vietnam and Thailand follows driven by supply chain factories migration from China.
