### SCOPE OF THE REPORT:

This report studies the Solid Tumors Drugs market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Solid Tumors Drugs market by product type and applications/end industries.

During 2017, the biologics segment dominated the market and accounted for close to 55% of the market share in terms of revenue. This segment consists of medicinal products extracted from biological sources such as human, animal, microorganisms, or they are manufactured using the latest, cutting-edge biotechnological processes. Biologics include products such as enzymes, blood and blood components, gene therapy, recombinant proteins, somatic cells, tissues, and vaccines.

In terms of geography, the Americas dominated the global solid tumors drugs market. The growth of this market in the Americas is attributed to the increasing uptake of existing biologics drugs and the launch of new biologics. However, the revenue from these drugs will decrease during the forecast period because of the loss of patent exclusivity of drugs, leading to the entry of generics. This decline is expected to be partially offset by favorable reimbursement plans by the government, such as the provision of Medicare and Medicaid. The US is the largest revenue contributor in this region.
