The global Solid Waste Sorting Box market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

A Solid Waste Sorting Box is a container used to separate different types of waste materials for recycling or disposal. It is a practical and effective way to encourage people to sort their waste and ensure that recyclable materials are properly separated from non-recyclable materials. The sorting box typically has multiple compartments that are labeled for different types of waste, such as paper, plastic, glass, and metal. This helps to reduce the amount of waste that ends up in landfills and promotes a more sustainable approach to waste management.
