## Abstracts

According to our (Global Info Research) latest study, the global Solvent Black 7 market size was valued at US\$ 160 million in 2024 and is forecast to a readjusted size of USD 207 million by 2031 with a CAGR of 3.5% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Solvent Black 7 is an organic dye synthesized from aniline compounds. The molecular structure of oil-soluble aniline black contains a large number of aromatic ring structures and some chemical functional groups. These structural characteristics give it good solubility and tinting power in oily media. During the dyeing process, the oil-soluble aniline black molecules will react chemically with the functional groups on the surface of the target substance to form a stable combination, thereby achieving the dyeing effect.
