## Abstracts

According to our (Global Info Research) latest study, the global Solvent-Borne Coating market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Solvent-based coatings are widely used in specific fields such as automobiles, furniture, construction and other industries. As these industries grow, demand for solvent-based coatings is likely to continue to grow. As global environmental awareness increases, governments around the world are strengthening regulations on volatile organic compounds (VOC) emissions. Solvent-based coatings will produce VOCs during use, so their future development may be restricted by environmental protection policies. In order to meet environmental protection requirements, coating manufacturers need to continuously improve product formulas and reduce VOC emissions.
