Abstracts

According to our (Global Info Research) latest study, the global Solvent Recovery Systems market size was valued at USD 1060.2 million in 2023 and is forecast to a readjusted size of USD 1318 million by 2030 with a CAGR of 3.2% during review period.

Solvent recovery is a form of waste reduction. In-process solvent recovery is widely used as an alternative to solvent replacement to reduce waste generation. It is attractive, like end-of-pipe pollution control, since it requires little change in existing processes. There is widespread commercial availability of solvent recovery equipment which is another attraction. Availability of equipment suitable for small operations, especially batch operations, make in-process recovery of solvents economically preferable to raw materials substitution. The solvent recovery systems are custom designed to optimize the recovery of solvents by combining condensers, receivers, vacuum pumps, and controls in a packaged system.

United States is the largest Solvent Recovery Units (SRUs) market with about 26% market share. Europe is follower, accounting for about 24% market share.

The key players are Dorr Group, Sulzer, Progressive Recovery, Cooper Technology, OFRU Recycling, Controls Group, Koch Modular Process Systems, Wintek Corporation, SRS Engineering Corporation, CBG Biotech, Maratek Environmental, Spooner Industries, Wiggins, CB Mills, KOBEX etc. Top 3 companies occupied about 10% market share.
