## Abstracts

According to our (Global Info Research) latest study, the global Solvent Recycling market size was valued at USD 1009.6 million in 2023 and is forecast to a readjusted size of USD 1321.8 million by 2030 with a CAGR of 3.9% during review period.

Solvent recycling is the process of taking used, dirty solvents and cleaning them until the solvent is returned to its pure form or to any acceptable specification. Used solvents are placed in a solvent recycler and “put through a process that fractionates and distills them from the chemicals that made them dirty — those introduced to create a reaction with the solvent.” Aside from the positive environmental impact from solvent recycling, a key benefit is cost reduction. Companies don’t need to buy the same amount of solvent, because it can be recycled, and disposal fees are greatly reduced with less of the dirty solvent discarded. This can be true for any segment of industry that uses solvents, including laboratories, auto body shops, paint shops and paint contractors.

In the solvent recycling market, there are three types of vendors. Some companies like Clean Planet Chemical, can offer recycling technology and provide recycling service, and customers are charged for the recycled solvent. The other type is that companies like IST Pure, mainly take selling solvent recycling machines as their key business. The third type is that companies like Maratek Environmental can both provide service and sell machines.

In this report, “Sales (K MT)” means the waste solvent handling volume of companies providing recycling service. And the 'Sales Revenue (Million USD)' and 'Price (USD/MT)' means the revenue and handling price for the recycling waste solvent respectively.

The main players including Veolia, Clean Planet Chemical, CycleSolv, Tradebe and Clean Harbors. The top five companies occupied about 55% sales revenue share.

The Global Info Research report includes an overview of the development of the Solvent Recycling industry chain, the market status of Printing Industry (On-Site Solvent Recycling, Off-Site Solvent Recycling), Painting & Coating Industry (On-Site Solvent Recycling, Off-Site Solvent Recycling), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Solvent Recycling.
