According to our (Global Info Research) latest study, the global Soy Protein For Animal Feed market size was valued at USD 1158.3 million in 2022 and is forecast to a readjusted size of USD 1469.2 million by 2029 with a CAGR of 3.5% during review period.

Soybeans remain the most efficient source of oil, and the animal industry continues to enjoy soybeans as a primary source of protein in the form of soybean meal — the by-product of oil extraction. Nevertheless, diets for young pigs and calves, and even broilers, cannot fully utilize normal soybean meal as it contains a plethora of anti-nutritional factors that are not completely eliminated. More concentrated forms of soybean protein are available, derived either from whole soybeans or from further processing of soybean meal. Soy protein concentrate (SPC) is the most common soy protein used in diets for young animals.

Global key players of Soy Protein For Animal Feed include CJ Selecta, ADM and Caramuru Alimentos, etc. The top three players hold a share over 60%. Brazil is the largest market, has a share about 50%. In terms of product type, Concentrated Soy Protein is the largest segment, occupied for a share of about 90%, and in terms of application, Aqua Feed has a share about 35 percent.
