Abstracts

The global Soy Protein For Animal Feed market size is expected to reach \$ 1469.2 million by 2029, rising at a market growth of 3.5% CAGR during the forecast period (2023-2029).

Global key players of Soy Protein For Animal Feed include CJ Selecta, ADM and Caramuru Alimentos, etc. The top three players hold a share over 60%. Brazil is the largest market, has a share about 50%. In terms of product type, Concentrated Soy Protein is the largest segment, occupied for a share of about 90%, and in terms of application, Aqua Feed has a share about 35 percent.

Soybeans remain the most efficient source of oil, and the animal industry continues to enjoy soybeans as a primary source of protein in the form of soybean meal — the by-product of oil extraction. Nevertheless, diets for young pigs and calves, and even broilers, cannot fully utilize normal soybean meal as it contains a plethora of anti-nutritional factors that are not completely eliminated. More concentrated forms of soybean protein are available, derived either from whole soybeans or from further processing of soybean meal. Soy protein concentrate (SPC) is the most common soy protein used in diets for young animals.

This report studies the global Soy Protein For Animal Feed production, demand, key manufacturers, and key regions.
