Abstracts

The global Soy Protein Isolate and Rapeseed Protein Isolate market size is expected to reach \$ 458 million by 2032, rising at a market growth of 14.3% CAGR during the forecast period (2026-2032).

Soy protein isolate is the soy protein with the highest content of protein. It is made from defatted soy meal by removing most of the fats and carbohydrates, yielding a product with 90 percent protein. Therefore, soy protein isolate has a very neutral flavor compared to other soy products. Because most of the carbohydrates are removed, the intake of soy protein isolate does not cause flatulence. Pure soy protein isolate is difficult to find in stores and is mainly used by the food industry and less by consumers. Maybe you can find it in health stores or in the pharmacy section of the supermarket. It is mainly found combined with other food ingredients; for example, soy protein shake powder is a mixture of soy protein isolate with flavors, minerals and vitamins.

North America, China, Asia Pacific (Ex China) and Europe are the major manufacturing market in the world. At present, the major manufacturers activities of soy protein isolate are concentrated in Solae Company (Danisco, Dupont), ADM, CHS, FUJIOIL, Yuwang Group and Shansong Biological Products, etc, with about 56% market shares.
