Abstracts

The global Space Travel Insurance market size is expected to reach \$ million by 2032, rising at a market growth of %CAGR during the forecast period (2026-2032).

Space tourism insurance is a specialized type of risk insurance designed for commercial space travel activities. Its core function is to provide economic protection and risk transfer for participants, operators, and related assets facing extreme and unknown risks throughout the entire space travel process.

With the maturation of commercial space technology and the increase in suborbital and orbital travel, the space tourism insurance market has broad prospects and is evolving from highly customized to gradually productized. In the short term, the market will grow rapidly along with the increase in flight frequency, with standardized supplementary clauses focusing on performance guarantees and risks during the ground phase emerging first. In the medium to long term, segmented insurance products targeting different orbital altitudes, mission durations, and healthy individuals will emerge, and premiums are expected to become more reasonable due to data accumulation and improved risk models. Major international insurance and reinsurance groups and professional brokers will continue to dominate this niche market. Ultimately, this insurance will not only serve as an economic compensation tool but will also become a key link in improving industry-wide safety standards through data-driven approaches, thereby providing a core financial and safety foundation for the normalization and scaling up of space tourism, supporting a trillion-dollar space economy ecosystem. This report studies the global Space Travel Insurance demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Space Travel Insurance, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Space Travel Insurance that
