Abstracts

According to our (Global Info Research) latest study, the global Space Travel Insurance market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Space tourism insurance is a specialized type of risk insurance designed for commercial space travel activities. Its core function is to provide economic protection and risk transfer for participants, operators, and related assets facing extreme and unknown risks throughout the entire space travel process.

With the maturation of commercial space technology and the increase in suborbital and orbital travel, the space tourism insurance market has broad prospects and is evolving from highly customized to gradually productized. In the short term, the market will grow rapidly along with the increase in flight frequency, with standardized supplementary clauses focusing on performance guarantees and risks during the ground phase emerging first. In the medium to long term, segmented insurance products targeting different orbital altitudes, mission durations, and healthy individuals will emerge, and premiums are expected to become more reasonable due to data accumulation and improved risk models. Major international insurance and reinsurance groups and professional brokers will continue to dominate this niche market. Ultimately, this insurance will not only serve as an economic compensation tool but will also become a key link in improving industry-wide safety standards through data-driven approaches, thereby providing a core financial and safety foundation for the normalization and scaling up of space tourism, supporting a trillion-dollar space economy ecosystem.

This report is a detailed and comprehensive analysis for global Space Travel Insurance

market. Both quantitative and qualitative analyses are presented by company, by region & country, by Product Types and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Space Travel Insurance market size and forecasts, in consumption value (\$ Million), 2021-2032

Global Space Travel Insurance market size and forecasts by region and country, in consumption value (\$ Million), 2021-2032
