The global Spandrel Glass market size is expected to reach \$ 2342 million by 2032, rising at a market growth of 3.2% CAGR during the forecast period (2026-2032).

This report studies the Spandrel Glass market, Spandrel glass is used to prevent materials or construction elements from being viewed from the exterior of a building. The primary function of spandrel glass is to cover non-visible areas including the areas between floors, hung ceiling areas, knee-wall areas below vision lights, and sometimes even columns or partitions. Spandrel glass is designed to mask vision through the structural areas of a building such as between floors and columns. Spandrel glass is widely used in curtain wall projects, where it provides non-transparence with high safety and resistance to corrosion. Spandrel glass must be heat treated to avoid thermal stress breakage. Solar Seal Spandrel Glass is lead-free and contains no organic solvents and can be handled at any stage without fear of personal or environmental harm.

Global key players of Spandrel Glass include Trulite Glass & Aluminum Solutions, Guardian Glass, LLC, NSG Group, Saint-Gobain, Viracon, etc. The top five players hold a share about 42%. In terms of product type, Ceramic Frit Spandrel Glass is the largest segment, accounting for a share of 46%. In terms of application, Commercial Building has a share about 60 percent.
