Abstracts

The global Spark Detection Systems market size is expected to reach \$ 352 million by 2032, rising at a market growth of 6.6% CAGR during the forecast period (2026-2032).

A spark detector is a simple device which monitors the infrared light within the field of view of a special sensor which detects light in the infrared range. This light is emitted from all things which emanate heat, and sparks or burning embers emit a greater amount of infrared light in contrast to the surrounding area within a typical room, workshop or factory floor. Fire is also detectable by the spark detector, which means any deflagration event within the ductwork will be registered and abated by a properly designed fire extinguishment system.

Europe is the largest market with nearly 30% market share, followed by North America and China. The spark detector industry has a low degree of concentration. The key players are Fagus-GreCon Greten, BS&B, Hansentek, Firefly, Control Logic, Flamex, Argus Fire Control, EWS, Atexon Oy, EDS Srl, Boss Products, Ampe Technology, Wuxi Yongan etc. The top three manufacturers occupied over 20% market share.

This report studies the global Spark Detection Systems production, demand, key manufacturers, and key regions.
