Specialty fire doors are fire-resistant isolation doors designed for high safety levels and special operating environments. They possess specified fire resistance limits, smoke prevention, explosion-proof properties, and impact resistance, effectively preventing the spread of fire and smoke in extreme situations such as fires. They are widely used in key protected buildings and industrial sites.

Upstream industries mainly include raw materials such as fire-resistant steel, stainless steel, fire-resistant sheets, fire-resistant glass, sealing materials, hardware accessories, and fire-retardant coatings. Downstream applications cover rail transportation, data centers, petrochemicals, energy facilities, hospitals, airports, public buildings, and high-safety-level industrial and municipal engineering projects. The global unit price of a specialty fire door is US\$1,700, with annual sales of approximately 9.13 million units and a global annual production capacity of 11 million units. The industry profit margin is 25%.
