Abstracts

According to our (Global Info Research) latest study, the global Specialty Trade Contractors market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

The specialty construction contractor industry includes establishments involved in performing specific activities such as pouring concrete, site preparation, plumbing, painting and electrical work related to construction of buildings. These establishments are not responsible for an entire construction project but perform activities such as new work, additions, alterations, maintenance and repairs on a contractual basis for the main builder or owner.

Specialty construction contractors are using prefabrication techniques to optimize construction process and reduce construction time. Prefabrication refers to construction of building elements off-site. Prefabrication enhances quality control, improves consistency, reduces risks and helps in mitigating safety hazards. Bathroom pods, headwalls, pipe racks and assemblies, raceways and conduit banks and junction boxes are some of the prefabricated components being used by electrical and plumbing contractors.
