## Abstracts

Specific protein testing are important markers for various diseases including microbial infections, cardiac risk, inflammatory response and even cancer. The complement system is a family of proteins that is essential for the destruction of bacteria, and viruses and is a most important part of the immune system. The measurement of proteins in the body assists in the evaluation and diagnosis of various conditions. The immunoturbidimetric kits for the study and research over the wide range of specific proteins includes unique products such as Apolipoprotein E, Apolipoprotein C-II, Cystatin C, Apolipoprotein C-III and Microalbumin. The specific protein testing monitors and helps in the diagnosis of the performance of immunology parameters and serum proteins including ASO, CRP, RF, Immunoglobulin and Complement Proteins. Three flexible size options are available to help reduce waste and costs.
