Abstracts

Speed Changer, Industrial High-Speed Drive, and Gear manufacturing market includes companies mainly involved in manufacturing industrial high-speed drives (except hydrostatic) automotive power transmission equipment gears and speed changers. Speed changers are the devices which changes the speed of vehicles such as gears and shafts. Gear is a rotating machine that enables the transmission of torque through meshing of cut teeth or cogs with another toothed part or rack. High speed drives offer decreased installation space for higher power and unnecessary gearboxes. These components are used primarily in mechanical power transmissions for industrial machines.

Scope of the Report:

This report studies the Speed Changer, Industrial High-Speed Drive, and Gear market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Speed Changer, Industrial High-Speed Drive, and Gear market by product type and applications/end industries.

Powder metal (PM) gear technology industry is being adopted by gear manufacturers to produce light weight components that consumes minimal power. Gears manufactured by powder metallurgy process are a cost-efficient alternative for the machined gears. It helps in reducing the inertia gear's resistance to change thereby offering high energy savings. Get Rag Ford have invested in this technology to facilitate automatic transmissions.
