Abstracts

The global Spent Coffee Grounds Fiber market size is expected to reach \$ 172 million by 2032, rising at a market growth of 6.3% CAGR during the forecast period (2026-2032).

In 2025, global spent coffee grounds fiber production reached approximately 43,588 ton, with an average global market price of around USD 2,500 per ton. A factory gross profit of USD 700 per ton with 28% gross margin. A single line full machine capacity production is around 350 ton per line per year. downstream demand is concentrated in textile, automotive and packaging. A packaging firm uses SCG fiber as filler in PLA-based bioplastics to improve rigidity, reduce carbon footprint and reduce plastic cost. Vietnam and India are leading the growth, driven by strong vertical integration in textile manufacturing and high tech, patented processing techniques. Germany heavy investments in advanced textile recycling infrastructure accelerate bio-enhanced material adoption across high-end fashion segments headquartered locally.
