Abstracts

The global Spices market size is expected to reach \$ 9189 million by 2032, rising at a market growth of 1.6% CAGR during the forecast period (2026-2032).

A spice is a dried seed, fruit, root, bark, or vegetable substance primarily used for flavoring, coloring or preserving food. Because they tend to have strong flavors and are used in small quantities, spices tend to add few calories to food. Many spices, however, can contribute significant portions of micronutrients to the diet.

A spice may have other uses, including medicinal, religious ritual, cosmetics or perfume production, or as a vegetable.

A spice may be available in several forms: fresh, whole dried, or pre-ground dried. Generally, spices are dried. A whole dried spice has the longest shelf life, so it can be purchased and stored in larger amounts, making it cheaper on a per-serving basis. Some spices are not always available either fresh or whole, for example turmeric, and often must be purchased in ground form. Small seeds, such as fennel and mustard seeds, are often used both whole and in powder form.

In this report, it includes the dried plant product used primarily for seasoning purposes or medicine effectiveness etc.

India is the largest Spices market with about 63% market share. China is follower, accounting for about 6% market share.

The key players are McCormick, Unilever, Ajinomoto, Ariake, Kerry Group Plc. (Ireland), Olam International, Everest Spices, Zhumadian Wang Shouyi, MDH Spices, Catch(DS
