Abstracts

The global Spinal Lamina Retractor market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The spinal lamina retractor includes two retractor jaws connected by pins that can be opened and closed. The retractor can satisfactorily expose the surgical field of view during spinal surgery and effectively hook the paraspinal muscles to increase stability. The lamina and articular process can be fully exposed, and it is not easy to fall off, which reduces surgical trauma and operation time.
