According to our (Global Info Research) latest study, the global Spinal Trauma Devices market size was valued at USD 13110 million in 2023 and is forecast to a readjusted size of USD 18070 million by 2030 with a CAGR of 4.7% during review period.

Spinal trauma refers to a severe injury to the spinal cord and requires the fixation of spinal trauma devices to treat bone deformities, facilitate bone fusion, strengthen and stabilize the spinal cord, and prevent further damage and complications. The products are involved in removing the damaged disc and replacing it with any fusion products. Non-fusion products are used during spine surgery, which are implanted to treat spine conditions. This also allows the patient to retain its movement and flexibility. The non-fusion products are becoming the treatment of choice, especially for the younger, more active patient.

Global Spinal Trauma Devices key players include Medtronic, DePuy Synthes, Stryker, NuVasive, Globus Medical, etc. Global top five manufacturers hold a share about 55%. North America is the largest market, with a share about 40%, followed by Europe, with a share about 30 percent. In terms of product, Spinal Fusion is the largest segment, with a share about 50%. And in terms of application, the largest application is Open Surgery, followed by Minimally Invasive Surgery, etc.
