Abstracts

The report is about Spine Surgery Products market. Spinal fusion products are used in spinal fusion surgery. The products are involved in removing the damaged disc and replacing it with any fusion products. Non-fusion products are used during spine surgery, which are implanted to treat spine conditions. This also allows the patient to retain its movement and flexibility. The non-fusion products are becoming the treatment of choice, especially for the younger, more active patient. Increase in number of spine surgeries, rise in use of bone grafts and bone morphogenetic proteins in spinal fusion surgery, growing number of spinal surgeries using electrical stimulation devices such as inductive coupling devices, captive coupling devices and other implants drives the market growth rate by 2025.

Scope of the Report:

This report focuses on the Spine Surgery Products in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The classification of Spine Surgery Products includes spinal fusion products and non-fusion products. And the proportion of spinal fusion products in 2017 is about 58%. Spine Surgery Products are widely used for open surgery and minimally invasive surgery. The most proportion of Spine Surgery Products is for open surgery, and the proportion is about 90%. Minimally invasive surgery is enjoying higher growth rate.
